Fire Safe Checklist for Commercial Buildings

Use our handy checklist to tick off what needs to be in place for fire safety at your commercial premises.

This applies to **small**, **medium** and **large** commercial buildings:

☐ Fire equipment is installed in the premises like fire extinguishers, fire sprinklers and fire alarms which comply with the latest safety standards. If unsure, speak to a fire safety expert.

☐ Fire equipment is located within an accessible place.

☐ Fire exits are clearly marked with proper lit exit signs.

☐ Fire exits are accessible for people with disabilities.

☐ There are fire certificates in place for the premises that certify that the landlord has regularly and properly serviced fire equipment.

☐ There is insurance both for the building and public liability in place.

☐ Fire wardens have been appointed for the building.

☐ The occupants of the building participate in fire drills every 3-6 months.
